- **Eyelid Procedures/Botox/Restylane and Perlane**
- **Complete Family Eye Care**
- **On-site Optical Shop**

Thank you for choosing **Hummel Eye Associates** as your eye care specialists. We are dedicated to helping you enjoy a lifetime of better vision through advanced technology and personalized patient care.

Your complementary screening will be conducted to determine your initial candidacy for Laser Vision Correction. It includes a measurement of visual acuity, measurement of your glasses and/or contact lenses and a preliminary judgment of the potential effectiveness of the surgery.

If you wear contact lenses, there are a few guidelines to reach optimal results. Soft contacts or disposables must be left out for 1 week prior to the exam. Toric contacts must be left out for 2 weeks prior to the exam. RGP (gas permeable) or hard contact lens wearers should wear their lenses to the exam. If candidacy is indicated, we'll provide you with alternative lenses for 3 weeks prior to your surgery date.

When you come in for the initial candidate screening, you will have the opportunity to meet with Dr. Chris Hummel and our Laser Vision Correction Team. You may ask any questions about the procedure and discuss a payment method that works for you.

In order to streamline your waiting time when you check in, we ask you to review and complete both the front and back of the enclosed forms. Bring the completed forms with you to your appointment. Although your candidate screening is complimentary, we also ask you to bring your medical insurance card/vision plan ID. On some occasions, according to your needs, "routine" appointments turn out to be medical eye exams and we want to be able to assist you in obtaining the highest level of benefits available to you.

If you have questions before your visit, please call our LASIK desk at 755-6111 or 1-800-522-3937. We know how important your precious vision is, and we appreciate the opportunity to provide all your eye care needs. We look forward to meeting you and thank you for your trust!

Sincerely,

Laser Vision Coordinator
